

Product Development Engineer

XSPlatforms is a rapidly growing international organization with innovative ideas, ambitious plans and high potential. With façade access solutions, fall protection systems, suspended platforms and scaffolding all under one roof, XSPlatforms is a one-stop shop for safe work at heights unlike any other.

XSPlatforms works towards making working at height safer and easier. People working at height must be able to rely on our products. That is why we set the bar high.

For our Product Development department we are looking for a:

Product Development Engineer Trade Products

As Product Development Engineer you convert the needs of the market into highly functional products. You are responsible for the conceptualization and engineering, as well as the certification of our new products. Additionally you carry out improvements to our existing product portfolio.

The key responsibilities associated with this role are:

- You are involved in product development within the Business Unit Trade Products. This includes scaffolding systems, suspended platforms, and fall arrest systems.
- You plan and organize your own activities and provide feedback to the Technical Manager regarding the progress.
- You establish programs of requirements in collaboration with the relevant stakeholders (including the Technical Manager, Sales and Management).
- You understand the relevant standards and apply them to product development.
- You create and maintain a proper technical file, including documentation such as calculations and product drawings.
- You specify performance testing parameters, test prototypes, document compliance with applicable requirements and communicate test results.
- You review released production drawings.
- You provide technical input to other departments, such as Marketing.

What do we expect from our new Product Development Engineer?

You are flexible, proactive, ambitious and motivated. You feel at home in an international environment and you can easily make and maintain contacts. Additionally you are good at setting priorities and you are able to switch between projects easily.

Key Qualifications

- Industrial Design Engineering Master's or Bachelor's degree.
- Advanced experience with 3D CAD. Experience with Solid Edge or Solidworks is preferred.
- Experience with a PDM system is a plus.
- Fluent in both Dutch and English (spoken and written).
- Commercial affinity.
- Analytical thinking.
- An accurate and well-organized way of working.

Apply to this job

Do you want to work in a dynamic, ambitious work environment with an informal corporate culture and short communication lines? And are you the experienced Product Development Engineer that we are looking for? We invite you to apply.

For more information about our organization or this job offer, contact Annemiek Holkamp, HR Manager at +31 (0)183 569111. If you'd like to apply, please send your resume and application letter to recruitment@xsplatforms.com.
