

WHO WE ARE

We are developing a toothbrush that is specifically designed for the elderly, making brushing teeth fast and effortless. This brings daily brushing within reach of millions whose teeth are rarely brushed.

We have huge ambitions and we need you to realise them!

WHAT WE OFFER

We offer the full startup experience: immense challenges, great responsibility and intense growth – business wise but also personally. And just as important: we offer you the opportunity to work on solving a serious problem and improve the lives of millions.

THE INTERNSHIP

We are looking for WO students, both Bachelor and Master!

We offer a fulltime internship, preferably 5-6 months (or a semester).

We have spots open starting from July (through the summer) and September (next semester) 2019 on!

Product Design Engineer

- You will be developing and creating prototypes and the final product.
- Rapid prototyping and testing to get to minimum design requirements as soon as possible
- Can help with the engineering of the product
- Has affinity with CAD (Rhino, Fusion360, Solidworks)

Interaction Designer

You will be testing our prototypes with users and design the product and methods to optimize user acceptance:

- Design and perform user test of product in lab setting and in practice
- Improve the User Experience of the product
- Design and test materials and methodologies to increase user acceptance

RELEVANT INFO

Yes, we do have an reimbursement. We prefer that you can work with us fulltime for a minimum of 3-5 months, but preferably longer (6 months). If you are a no-nonsense and hard working person with fun spirit and humour you might be the right person for us!
