

Coolfinity

Design & Innovation Intern

Where? Amsterdam-Zuid (next to Campus Uilenstede)

When? Starting in February for 4 – 6 months

WHO ARE WE?

We are a multiple award winning social enterprise, located in Amsterdam-Zuid (next to campus Uilenstede), that designs, markets and makes fridges that keep on cooling even during power outages. This is mainly meant for countries that suffer from long power outages.

Although we are a spin-out from a huge brewery in Amsterdam, cooling is not only needed for food & drinks, but also for medication (i.e. vaccines) and fresh milk. We have the ambition to provide cooling anywhere in the world where it currently is not possible.

WHO ARE WE LOOKING FOR?

We are looking for a student with a passion for the design & innovation of world changing products. We are constantly looking for ways to expand our product portfolio and how we can add more value to our customers. The scope for this internship is quite broad, but typical for IDE students:

- Develop product line extensions
- Develop product add-ons
- Develop services around the product
- Work on our branding (Brand DNA, corporate identity etc)
- Create new marketing material (Flyers, brochures etc)
- Open to your creative suggestions 😊

WHAT DO WE NEED?

- Full time availability
- Fluent in English (speaking & writing)
- Good (digital) visualisation skills
- A self-starter
- End Bachelor or Master level

WHAT DO WE OFFER?

- Develop your design & innovation skills in the context of a world changing product
- A small and fun team, professional, informal and always willing to help
- Office with ping pong and coffee & stroopwafels every day
- €300,- per month

HOW DO YOU APPLY?

Applying for the internship is easy, just send us the following:

1. Send an email to steven@coolfinity.com (Design & Innovation Manager), with your CV, (compact) portfolio and short motivation (max. 100 words)
2. Within a few weeks you'll hear whether you'll be invited for a meeting at our office
3. From the invited people we'll select the lucky person for this internship

Also check www.coolfinity.com for more information about us!
